

My husband and I spoke with Dr. Carol Albers on the phone for the first time in January 2007, and asked her to help us with our home study for Ukraine. Dr. Albers kindly accepted in and in March 2007 she travelled to France, where we live, to see us and start our paperwork on our adoption. She is a very professional, extremely kind and very human person. We liked her very much and we saw in her a lot of sensibility and knowledge in her work. We are in the stage where we have just submitted our dossier to the SDA in Kiev through the facilitator that Dr. Albers has, who is also a competent man, and we are waiting for more news by the end of May.

Dr. Albers guided us all the way in our adoption process with all the paperwork, not to mention all the questions we constantly had and she answered always with great patience, empathy and dedication. She has been wonderful to us, and we truly believe that she is the right person to have when you have to go through something as delicate and emotional as adopting a child.
